

Calendar Math Skills need to continue for this year. These skills are critical for repetition and embedded skills and content that are not covered by Common Core...

- This should be done at the beginning of the day and **only for 10-15 minutes NO MORE!!!**

For this month you will address the August/September Elements. These elements include:

- Computations and Connections: develop strategies for computing number facts & construct visual images of number facts.
- Counting Tape/Hundred Chart: explore odd and even numbers; group count by ones, twos, fives, and tens; and understand place value.
- Daily Depositor: use mental math strategies to group and add.
- Graph: collect and organize data, predict probability & express likelihood of an occurrence.
